

Important Notice: USB flash Disk

Our STB system only support USB flash disk with FAT32 format, we found that some USB flash Disk may have interface problem with our HD STB such as models HD838 and HD2008. The data stored in the USB flash Disk may be damaged. In order to avoid any data lost, please make a back up for your files before connecting your USB flash Disk to the STB. This problem will be resolved soon and the new firmware together with other new improvements will be posted to this website once available. Then you may download the new firmware and upgrade your STB via USB flash disk via USB port. Your USB flash disk should be formatted with FAT32 before use.

重要啓示: USB flash disk

我們解碼器 STB 系統目前只支持 FAT32 格式的 USB flash disk，我們發現有部分 USB flash disk 不能與本公司之高清數碼解碼器(如 HD838, HD2008) 正常運作，在連接在解碼器後,USB flash disk 內之資料會有損毀之可能。因此現提醒各位顧客在使用前應對 USB flash disk 內之資料作備份，以防損失。此問題會在不久之將來可以從軟件升級解決。升級軟件可從本公司網站下載。你可用 USB flash disk 作升級。但 USB flash disk 必需以 FAT32 格式化。
